

Job offer

MTA, BTA, CTA, Laboratory or Bachelor (Biology / Biotechnology) as technical assistant

21st June 2021

Company:

Minerva Analytix GmbH provides diagnostic services to companies in the field of contamination and food safety under GMP conditions. Our core competence is in the control of mycoplasma, bacteria and viruses in various materials such as cell cultures, biopharmaceutical products or food using molecular biological methods.

Laboratory:

We offer a cell and molecular biology laboratory set up to study BSL2 / 3 ** samples with a broad expertise in performing rapid microbiological methods (i.e. viruses, bacteria and fungi).

Tasks:

Execution of rapid microbiological tests in the molecular biological laboratory on behalf of the customer:

- Molecular biological analyzes (RNA / DNA extraction, qPCR, cell culture)
- Analysis, evaluation and documentation
- Equipment qualification
- Participation in quality management measures

Conditions:

- Training as a technical assistant (MTA, BTA, CTA) or laboratory technician
- or Bachelor (Biology / Biotechnology / Biochemistry)
- Interest and fun in lab work
- Good knowledge of the German language
- Flexibility and a high degree of reliability
- Organizational skills
- Commitment
- Ability for teamwork
- Experience in using the PC
- Use of standard software (MS Office)
- Customer-oriented appearance and action

We offer:

A modern equipped laboratory, careful training according to GMP, regular training and an interesting job in a continuously growing market.
